Will a pole building solve your storage problems? How long will it take to construct? Will the cost be affordable? Let your friends at The Yard give you a hand.

- Check your local zoning restrictions.
- Determine your storage needs including the size of the equipment and materials you need to store.
- Assess the desired location and ease of access to it.
- Consider the need for heating and ventilation as well as the best use of natural light and the placement of any windows.

THE MOST STORAGE FOR YOUR MONEY.

Pole buildings have been popular with farmers because of their spacious inexpensive construction. But today, with improved materials and easy maintenance, pole buildings, shelters and sheds are becoming popular structures for retail, warehouses and residential use as well.

Whether you're looking for storage for your farm equipment or some other space for a growing business, a pole building package from The Yard might be just what you need.

WHY BUY A PACKAGE?

Pole building packages from Carter Lumber take the guesswork out of building your pole building. Packages can be easily customized to your specs, and they include all the materials needed for building.

Photos may vary from actual packages.
