

New windows and doors are big investments. Before you place your order, think about all the aspects of the job.

- Your friends at The Yard can tell you how to get the most accurate measurements for your window and door openings.
- Consider how the door opens, and what type of hardware and lockset you'll need.
- Do you want to improve ventilation? Consider replacing fixed windows with ones that open. Or add a storm door with a screen to your entry door.
- Decide if you need grilles or screens for your windows. Some windows can be ordered with built-in mini blinds for privacy.
- Think about installing patio doors instead of windows for more light in appropriate areas.

A GREAT NEW LOOK, PLUS LOWER ENERGY BILLS.

Uppdate the appearance of your home and make it more energy efficient at the same time with new windows. Check out our display at The Yard and ask our knowledgeable sales staff about R-values, maintenance and the styles that will look best in your home.

Why choose wood?

- Most traditional residential frame
- Thermal resistant
- High R-values
- Not affected by temperature extremes
- Can be stained or painted to match your color scheme

Why choose vinyl?

- Available in a wide range of styles & shapes
- Moderate to high R-values
- Easily customized
- Low maintenance
- Does not require painting
- Comparable to wood in thermal resistance
- Good moisture resistance

Pella Windows

When you think of quality windows, think of Pella. An innovator in window design and technology since 1925, Pella offers solutions for every window installation. Pella windows feature stain-grade wood interiors with aluminum-clad white exteriors. Several grades of insulated glass make them extremely energy efficient. Screens and grilles can be ordered for all window sizes.

Jeld-Wen Windows

An innovator in window design and technology, Jeld-Wen offers solutions for every window installation. Jeld-Wen vinyl windows offer maximum energy efficiency, security and peace of mind.
